No APR attachments found.		

General Supervision System:

The systems that are in place to ensure that IDEA Part C requirements are met, e.g., monitoring systems, dispute resolution systems.

Monitoring

The Individuals with Disabilities Education Act (IDEA) Part C system in Nebraska, known as the Early Development Network (EDN), is co-administered by the Nebraska Department of Education (NDE), Office of Special Education and the Nebraska Department of Health and Human Services (DHHS), Division of Medicaid and Long-term Care (aka "Co-Lead Agencies" or "the Co-Leads"). Per the Nebraska Early Intervention Act, these 2 agencies are responsible for the planning, implementation, and administration of the federal Early Intervention Services System and the Nebraska Early Intervention Act. Additionally, the Nebraska Early Intervention Act requires interagency Planning Region Teams (PRT's) to be responsible for assisting in the planning and implementation of the Early Intervention Act in each local community or region. The IDEA Part C regulations require the Nebraska Part C Co-Lead Agencies to monitor local Early Intervention Programs on the implementation of early intervention regulations outlined in NDE 92 NAC 52 (Rule 52) and DHHS 480 NAC 3.

Each of the 29 PRT's is an interagency coordinating council made up of local schools, health and human service agencies, community agencies, Head Start, families, and others who provide early intervention services. Each PRT covers a specific geographic area of the state and is responsible for implementation of an interagency system of services in the region. The EDN Services Coordination agency within the PRT assumes the responsibility for delivery of the entitlement of services coordination in the region. The EDN Services Coordination agency may be the same agency selected by the PRT as the lead agency, but in many cases, these are two separate agencies working collaboratively to provide early intervention services in the region.

The Nebraska Part C Co-Lead Monitoring process gathers data from multiple sources, analyzes results, identifies gaps with Part C services, rates PRT performance, and stimulates the development of improvement activities for the PRT. The monitoring process relies on multiple sources of data to gauge the effectiveness of early intervention supports and services for infants and toddlers with disabilities and their families. Nebraska has developed monitoring procedures which require PRT's to be reviewed at least once every three (3) years for implementation of the requirements under Part C of IDEA. The Nebraska Part C Co-Lead Agencies review a variety of data sources to document each PRT's compliance with NDE 92 NAC 52 (Rule 52) and DHHS 480 NAC 3, including:

1. IFSP File Review
2. Completion of prior Corrective Action Plans;
3. Policies and Procedures Review;
4. Forms Review;
5. Review of results from mediations, complaint and due process reports; and
6. Review of supporting data from sources such as, PRT child count, Referral vs. Verification Data, Referral Sources, CAPTA, and Performance Reports for the last 3 years.

The steps in the monitoring process include:

Step One: The Part C Co-Leads schedule the monitoring plan for the upcoming year. The monitoring team is composed of the Part C Co-Coordinators and additional NDE and DHHS staff to assist in the Monitoring process. The PRT Lead Agency receives the Notification letter informing the PRT of the scheduled date of the upcoming Part C Monitoring.

The Part C Monitoring Team meets with the PRT members to discuss the various components of the monitoring process, including IFSP file reviews, correction of noncompliance, verification of correction of noncompliance, how information generated from the monitoring activities will be incorporated into the Corrective Action Plan (CAP) and PRT Improvement planning process to improve results for infants/toddlers with disabilities and their families.

Step Two: The Part C Monitoring Team reviews the PRT's early intervention process, including the following components:

- Forms used by the PRT to document the implementation of 92 NAC 52 and 480 NAC 3
- IFSP Files
- PRT Policies, Procedures and Practices
- Review of any complaints filed and investigated by the Co-Lead Agencies pursuant to 92 NAC 52 and 480 NAC 3

- Review of any due process findings issued pursuant to 92 NAC 55
- Review of the timely correction of any noncompliance identified during the previous monitoring cycle.
- Issues identified as part of previous fiscal review or sub-recipient fiscal reviews.

Step Three: The Part C Monitoring Team conducts the Focused Onsite PRT Exit Conference. The result of the PRT monitoring is shared with the PRT members. This visit allows an opportunity for clarification or submission of evidence to determine whether or not compliance was met.

Step Four: The Part C Co-Leads provide written notification of Findings to the PRT. The PRT must submit a CAP within 45 days to the Part C Co-Leads. Upon submission of the PRT's CAP, the Part C Co-Leads will give approval in writing.

Step Five: Verification of Correction of Noncompliance and Closeout of Monitoring Process. Pursuant to 92 NAC 52-004.02E, all noncompliance must be corrected as soon as possible, and in no case later than one year from the date on which the PRT is notified of a finding of noncompliance. For all individual instances of noncompliance that can be corrected, the PRT must immediately correct and submit evidence of correction to the Part C Co-Leads, who will document the receipt of evidence of the individual correction. The Closeout Letter will be completed by Part C Co-Leads following the completion of the verification activities and the final report. This Closeout Letter is a clear statement by the Part C Co-Leads that the PRT has corrected the areas of noncompliance previously identified, has successfully completed the CAP, and the PRT is now in full compliance with IDEA Part C Regulations, NDE 92 NAC 52, and DHHS 480 NAC 3.

Dispute Resolution

Complaints
The NDE Complaint Investigator will complete the complaint process as identified in 92 NAC 51-009.11, meeting the appropriate timelines. All correspondence to the complainants is completed by the Complaint Investigator. If any noncompliance is identified, the agency will be contacted and required to complete a CAP, and the Complaint Investigator will send the Closeout Letter.

FFY 2015 Part C State Performance Plan (SPP)/Annual Performance Report (APR)

The NDE Legal Office provides guidance to Parents, etc., on completing the Dispute Resolution element of the due process hearing in accordance with 92 NAC 51-009.13. Other mediation requests are handled through the regional Mediation Centers, in accordance with 92 NAC 51-009.12.

Mediation

Mediation is an integral part of the complaint and due process procedures. There are six (6) Mediation Centers located regionally throughout the State of Nebraska to provide services to parents, families and school districts.

Provision of a Free Appropriate Public Education (FAPE)

Since Nebraska is a Birth-mandate state, the Nebraska Department of Education, Office of Special Education works with school districts, service agencies and approved cooperatives to ensure that all infants and toddlers with disabilities in the State of Nebraska are receiving a free, appropriate public education (FAPE) in their natural environment to the maximum extent appropriate.

Timely and Accurate Reporting of Data

The Nebraska Department of Education, Office of Special Education works with PRT's, school districts, service agencies and approved cooperatives to ensure that all data requirements are met in reporting the data. "Deadlines are Deadlines" is the rule for reporting data on time, and ensuring that the data is accurate and not needing to be returned for further review and revision.

Technical Assistance System:

The mechanisms that the State has in place to ensure the timely delivery of high quality, evidenced based technical assistance and support to early intervention service (EIS) programs.

For several years, the Nebraska Part C Co-Leads-- Department of Education (NDE) and the Department of Health and Human Services (NDHHS), also referred to in Nebraska as the Early Development Network (EDN)—have provided significant training and technical assistance (TA) consistent with evidence-based research in early intervention/early childhood special education (EI/ECSE) and the mission, beliefs and principles promoted by National Early Childhood Technical Assistance Center (NECTAC). Intensive statewide training began in 2001 focusing on the provision of services in natural environments, use of the Primary Service Provider service delivery model, and coaching and teaming practices. In later years, training in the use of the Routines Based Interview (RBI) as a child and family assessment process and writing functional and meaningful child and family outcomes was added. The RBI is an assessment tool that uses the research about how young children learn, i.e. through natural learning opportunities within their family, to facilitate family engagement toward improving child and family outcomes. These training initiatives were provided in large part by Dr. Robin McWilliam of the Siskin Institute in TN, and Dathan Rush and M'Lisa Shelden of the Family Infant Preschool Program in NC--national researchers and presenters on evidence based practices in early intervention-- and were coordinated through the NDE Early Childhood Training Center (ECTC), which continues to be the hub for professional development across all early childhood systems in Nebraska including childcare, Head Start, Part B 619 and Part C. ECTC coordinates a centralized system of professional development opportunities and tracking across settings where young children with disabilities and their families participate. Local Planning Region Teams (PRT) and school districts also access the ECTC with their training requests, which are coordinated regionally by 7 Early Learning Connection coordinators (ELCs). The ELCs are responsible for ensuring professional development opportunities are provided to meet state and federal requirements for all early care and education professionals within their region and are ultimately part of the ECTC system.

Although many of our state's efforts are now primarily related to the RDA work, Nebraska has additional ongoing training efforts that peripherally impact the State Identified Measureable Result (SIMR) as well. These training efforts include: Special Care which focuses on child care providers who care for children with disabilities; Early Learning Guidelines trainings which provides information about developmentally appropriate practices across domains in inclusive settings; Bridges Out of Poverty; CSEFEL Teaching Pyramid; CAPTA-related trainings to child welfare, court and EI personnel; and Circle of Security training -- all of which are supported through collaboration with multiple state and private agencies - Nebraska Children and Families Foundation, Nebraska Division of Public Health/Maternal Child Health unit, Nebraska Division of Child Welfare, Nebraska Head Start State Collaboration Office, University of Nebraska's Center for Children, Families and the Law, University of Nebraska's Munroe Meyer Institute, Higher Education partners at the University of Nebraska Lincoln and Omaha, and the Nebraska Infant Mental Health Association.

The Parent Training & Information center (PTI) is a family partner to the EDN Co-Leads and provides numerous training activities for families, services coordinators and services providers as well as PRT members. Family representatives have the opportunity to influence training and TA activities both at the state and local levels by participating in planning sessions and through the provision of feedback. Trainings offered to families include: All about EDN, IFSP and IEP training, and Rebuilding Dreams which addresses family grief at learning that their child has a disability. Families can also call PTI at any time to receive individual TA.

Beginning in 2012, after spending several years using 3 different child assessment tools to collect data for the federal child outcomes (in Nebraska this is referred to as "Results Matter"), Nebraska moved to a single assessment tool, Teaching Strategies GOLD. Currently, annual Basic GOLD training for new teachers and new administrators is offered in rotating locations so as to provide access for new staff including early intervention providers as part of the broader early care and education system. The Teaching Strategies GOLD trainings include instruction in use of the on-line system for data collection and the ELCs are responsible for coordinating any individual TA needs within their regions.

Nebraska has spent considerable energy building an "internal" support structure--necessary if we are to move innovative practices and programs from initial training to full implementation. This effort began sincerely in 2009 when two Nebraska practitioners attended the Siskin National Routines Based Interview (RBI) training institute in Chattanooga, TN to become nationally certified interviewers. Building infrastructure from the top down, the Part C Co-Lead Coordinators and the Part B 619 Coordinator, along with the two newly certified RBI trainers formed a State level implementation team. Using the RBI as the first of Nebraska's "usable interventions", the state began to pilot a statewide implementation plan of training and TA for the RBI as well as other evidence based practices. Over the next 4 years, Nebraska Part C dollars funded an additional sixteen service providers and services coordinators to attend the RBI Siskin Institute with the intent of strategically placing certified RBI trainers geographically across the state.

Simultaneously, over these same 4 years, the ECTC coordinated professional development opportunities, funded by NDE/DHHS, to address evidence-based practices directly impacted by use of the RBI, e.g. Support Based Home Visits, Integrated Service Delivery, and Collaborative Consultation with Childcare. Professional development opportunities and TA have been facilitated through the use of the Nebraska Team Self-Assessment Tool--Implementing Evidence-Based Practices in Natural and Inclusive Environments for Children Birth to 3. This tool was adapted from the original work of Robin McWilliam. The Nebraska version was piloted with 10 teams from across the state who came together to reach consensus about priority practices needing ongoing TA. Based on this initial work, these ten teams became our state's first local implementation teams. The statewide coordinators provide TA to support the work of these teams through biannual conference calls and assistance.

Because use of the RBI impacts the overall EI process, the focus of the stakeholder groups and our professional development/TA expanded to include evidence based practices beyond child and family assessment. Using the implementation science research, the state leadership team developed an implementation plan aimed at bringing other EI teams from across the state (both Educational Service Unit and school district based teams) on board. In order to sustain the work already begun, the leadership team looked to the RBI trainers and coaches on these stakeholder teams to be not only leaders within their programs, or PRT, but to assist the state level team in planning for new EI teams. The team self-assessments, facilitated by one or both of the two statewide consultants, became a pre-requisite for targeted TA to new teams and results in a direct communication link back to the state level team regarding implementation problems, issues or challenges. RBI trainer/coach conference calls scheduled along with the existing stakeholder calls has allowed for the development of an RBI statewide fidelity process as well as specific planning for ongoing training and TA.

The Early Development Network (EDN) website provides access for service providers, administrators, services coordinators, planning region teams and families to all things Part C related including regulations, guidelines, examples and samples from local PRTs, and training announcements. The site also connects to on-line training modules which have been developed over the past 3 years to address such foundational topics as the development of quality IFSPs, home visitation principles, Medicaid waiver, services coordination and pre-service training for new services coordinators. Additionally, because of the ongoing work with the RBI, a website focusing on evidence based practices for service providers, services coordinators and administrators was launched three years ago. This site is organized around the aforementioned EI team self-assessment tool to allow users just-in-time, informational, one-pagers highlighting a description of each practice, its basis in regulation and/or research, and on-line tools to use.

In order to more efficiently use federal Part C dollars, the state leadership team offered its first Nebraska-based RBI training during the summer of 2013. Utilizing the skills of the state's Siskin trained RBI cadre, Nebraska's "RBI Boot Camp" yielded a new group of RBI trained service providers and service coordinators, offering even broader statewide implementation. The Boot Camp, offered again in the summers of 2014 and 2015, has helped current stakeholder teams to sustain the RBI practice to fidelity and train new team members, while also training service providers and services coordinators from new areas of the state. Although the initial focus of the Boot Camp was the development of routines-based interviewing skills and writing functional outcomes, an additional component was added in 2014: a training of the trainer (TOT) session. The TOT includes recommended training practices and processes, recommended fidelity checks, as well as Power Point presentations, handouts, etc. Teams with RBI approved trainers have been invited to join the state stakeholder teams now re-purposed as RBEI or Routines Based Early Intervention.

In keeping with the expansion of implementing evidence based practices beyond the RBI, the Co-Leads hosted a webinar about the primary service provider approach and then brought Dathan Rush and M'Lisa Shelden to the state for an institute in February, 2014. The institute focused on natural learning opportunities, coaching and teaming practices. Teams were required to have participated in the team self-assessment, to be using the RBI, to have organized team meetings and be representative of all Part C services including an administrator/coordinator/supervisor. In addition to the 2 day institute, a half day training was provided for "internal master coaches", one person appointed from each team. These master coaches received on-going supports by Rush and Shelden via coaching logs and individual feedback provided through monthly

FFY 2015 Part C State Performance Plan (SPP)/Annual Performance Report (APR)

coaching calls, again funded by Part C dollars. Their role is to provide coaching to their teams as they implement the new practices.

New EDN services coordinators have the opportunity to participate in pre-service training and all services coordinators, service providers and Part C supervisors participate in face to face training, typically as part of an annual EDN conference, which also includes EI service providers and administrators. In addition the Co-Leads provide TA by request through face to face meetings, conference calls and webinars. The Annual EDN conference provides a forum for training on the Part C regulations, and offers a technical assistance guidance. In addition, the conference provides information related to RDA, including: (1) Nebraska's RDA strategies: the RBI, functional child and family outcomes, and routines based home visits, (2) the shift in focus from individual EI teams to the Planning Region Teams (PRTs) for both training and evaluation purposes as part of RDA. The Co-Leads have been and will continue to provide targeted training/TA as a result of needs identified via this monitoring process.

Because Nebraska has chosen to implement RBEI within pilot PRTs initially, professional development and TA efforts are being planned on both a micro (pilots) and a macro level (statewide over the next 5 years). Webinars have been developed to provide an overview of the RDA work, introduce the RBI, and provide functional outcome guidance. In addition, there will be RBI and functional outcome training in the local pilot PRT sites. Regional TA RBEI trainer/coaches have also been developed and will be utilized over the next year to implement data-driven professional development and TA. Over the course of the next 5 years, evaluation procedures will be put in place for the implementation of the RBI, the functional child and family outcomes and quality home visits. Ongoing feedback to the pilot PRTs regarding evaluation results will be conducted. The results will be used to make adjustments to training and TA initially at the pilot PRT level, but ultimately to the statewide plan to bring the state to "full" implementation.

Stakeholder Involvement: apply this to all Part C results indicators

The mechanism for soliciting broad stakeholder input on targets in the SPP, including revisions to targets.

Stakeholder Involvement: Nebraska regularly seeks input from stakeholders when establishing policy, regulation or implementation strategies. Specific to the development of the State Improvement Plan and Annual Performance Report, Nebraska has established a broad based stakeholder group. The group included representatives of parents, school district Directors of Special Education, special education staff, early childhood programs, Routines Based Early Intervention (RBEI), higher education, services coordination, Head Start, Health and Human Services, community agencies, early intervention services providers, court system, school psychologists, early childhood special education, and the medical field.

This group has met periodically throughout the past year and will continue meeting to establish/review targets and performance as indicated in the SPP/APR and the development and implementation of the State Systemic Improvement Plan (SSIP). Thus far the Stakeholders have reviewed historical data around each of the indicators and established targets for each of the indicators. Additionally, the Stakeholders assisted NDE in establishing the State Identified Measurable Result (SIMR). During 2015 and 2016 the Stakeholders provided guidance and input on Phase II and Phase III activities and evaluation measures of the SSIP.

In addition to the Stakeholder group established specifically for the purpose of gathering input on the SSIP and SPP/APR, Nebraska also obtains input from the Special Education Advisory Council (SEAC) and the Early Childhood Interagency Coordinating Council (ECICC). These Councils are established pursuant to 34 CFR 300.167 and 34 CFR 303.600 and as such provides for input from a diverse group of stakeholders. The Councils regularly discuss the SPP/APR and provides input on the targets and strategies contained therein. SEAC and ECICC will continue to be utilized for input on the development of the SSIP and the SIMR.

Reporting to the Public:

How and where the State reported to the public on the FFY 2013 performance of each EIS Program or Provider located in the State on the targets in the SPP/APR as soon as practicable, but no later than 120 days following the State's submission of its FFY 2013 APR, as required by 34 CFR §300.602(b)(1)(i)(A); and a description of where, on its Web site, a complete copy of the State's SPP, including any revision if the State has revised the SPP that it submitted with its FFY 2013 APR in 2015, is available.

Planning Region Team performance on each of the APR indicators is reported each spring on the Early Development Network website. The report can be found at <http://edn.ne.gov/spp/regional-data.html>. The Early Development Network website is a site that provides information to the public, families, services providers and the Planning Region Teams on the Early Intervention program in Nebraska. A copy of the state's SPP is also located on the EDN site, <http://edn.ne.gov/spp/annual-performance-report.html>, as well as on the Nebraska Department of Education, Special Education office website at <http://www.education.ne.gov/sped/publicreporting.html>.

Actions required in FFY 2014 response

--

Indicator 1: Timely provision of services
Historical Data and Targets

Monitoring Priority: Early Intervention Services In Natural Environments

Compliance indicator: Percent of infants and toddlers with IFSPs who receive the early intervention services on their IFSPs in a timely manner.

(20 U.S.C. 1416(a)(3)(A) and 1442)

Historical Data

Baseline Data: 2005

FFY	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014
Target			100%	100%	100%	100%	100%	100%	100%	100%	100%
Data		99.43%	100%	100%	100%	100%	100%	100%	100%	100%	100%

Key: Gray – Data Prior to Baseline Yellow – Baseline Blue – Data Update

FFY 2015 - FFY 2018 Targets

FFY	2015	2016	2017	2018
Target	100%	100%	100%	100%

FFY 2015 Part C State Performance Plan (SPP)/Annual Performance Report (APR)
Indicator 1: Timely provision of services
FFY 2015 Data

Monitoring Priority: Early Intervention Services In Natural Environments

Compliance indicator: Percent of infants and toddlers with IFSPs who receive the early intervention services on their IFSPs in a timely manner.

(20 U.S.C. 1416(a)(3)(A) and 1442)

FFY 2015 SPP/APR Data

Number of infants and toddlers with IFSPs who receive the early intervention services on their IFSPs in a timely manner	Total number of infants and toddlers with IFSPs	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data	Status	Slippage
68	69	100%	100%	98.55%	Did Not Meet Target	Slippage

* FFY 2014 Data and FFY 2015 Target are editable on the Historical Data and Targets page.

Explanation of Slippage

Slippage can be attributed to only 1 IFSP file which was found to be out of compliance due to the early intervention service being provided beyond the timeline established by the co-leads. Therefore, it appears that compliance with this indicator is at a reasonably high level. Because the requirements for this indicator has such a significant impact on the provision of services to infants and toddlers, the Co-Leads believe that it is important to continue training to ensure that all EIS programs correctly implement the specific regulatory requirements and have strategies in place to ensure compliance. The Co-Leads will continue to conduct additional professional development/technical assistance activities as outlined under the Professional Development and Technical Assistance section of the APR.

Number of documented delays attributable to exceptional family circumstances

This number will be added to the "Number of infants and toddlers with IFSPs who receive their early intervention services on their IFSPs in a timely manner" field above to calculate the numerator for this indicator.

0

What is the source of the data provided for this indicator?

- State monitoring
- State database

Describe the method used to select EIS programs for monitoring.

The Nebraska Department of Education (NDE) and Nebraska Department of Health and Human Services (NDHHS), acting as co-lead agencies (the Co-Leads), are responsible for ensuring Part C of the Individuals with Disabilities Education Act (IDEA) is fully implemented for all infants and toddlers with disabilities and their families through the Early Development Network (EDN). The Part C Co-Leads monitor the state's 29 Planning Region Teams (PRTs) on a three year cycle. IFSP files and other records maintained by Services Coordinators are reviewed for compliance with IDEA and Medicaid.

The Individualized Family Service Plan (IFSP) checklist file review for Improving Learning for children with Disabilities (ILCD) gathers data regarding the receipt of early intervention services on IFSPs in a timely manner.

In FFY 2015, eight (8) of the Planning Regions participated in an IFSP file review for a total of 69 files. 68 of the 69 files (98.5%) were in compliance with the IFSP completed in a timely manner.

Provide additional information about this indicator (optional)

Indicator 1: Timely provision of services

Required Actions from FFY 2014

Monitoring Priority: Early Intervention Services In Natural Environments

Compliance indicator: Percent of infants and toddlers with IFSPs who receive the early intervention services on their IFSPs in a timely manner.

(20 U.S.C. 1416(a)(3)(A) and 1442)

Actions required in FFY 2014 response

none

Responses to actions required in FFY 2014 response, **not including correction of findings**

Indicator 1: Timely provision of services

Correction of Previous Findings of Noncompliance

Monitoring Priority: Early Intervention Services In Natural Environments

Compliance indicator: Percent of infants and toddlers with IFSPs who receive the early intervention services on their IFSPs in a timely manner.

(20 U.S.C. 1416(a)(3)(A) and 1442)

Correction of Findings of Noncompliance Identified in FFY 2014

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
0	0	0	0

Correction of Findings of Noncompliance Identified Prior to FFY 2014

	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2014 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected
None			

Indicator 2: Services in Natural Environments

Historical Data and Targets

Monitoring Priority: Early Intervention Services In Natural Environments

Results indicator: Percent of infants and toddlers with IFSPs who primarily receive early intervention services in the home or community-based settings.

(20 U.S.C. 1416(a)(3)(A) and 1442)

Historical Data

Baseline Data: 2005

FFY	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014

Indicator 2: Services in Natural Environments

Required Actions from FFY 2014

Monitoring Priority: Early Intervention Services In Natural Environments

Results indicator: Percent of infants and toddlers with IFSPs who primarily receive early intervention services in the home or community-based settings.

(20 U.S.C. 1416(a)(3)(A) and 1442)

Actions required in FFY 2014 response

none

Responses to actions required in FFY 2014 response

Indicator 3: Early Childhood Outcomes
Historical Data and Targets

Monitoring Priority: Early Intervention Services In Natural Environments

Results indicator: Percent of infants and toddlers with IFSPs who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/ communication); and
- C. Use of appropriate behaviors to meet their needs.

(20 U.S.C. 1416(a)(3)(A) and 1442)

Does your State's Part C eligibility criteria include infants and toddlers who are at risk of having substantial developmental delays (or "at-risk infants and toddlers") under IDEA section 632(5)(B)(i)? No

Historical Data

	Baseline Year	FFY	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014

Indicator 3: Early Childhood Outcomes
FFY 2015 Data

Monitoring Priority: Early Intervention Services In Natural Environments

Results indicator: Percent of infants and toddlers with IFSPs who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/ communication); and
- C. Use of appropriate behaviors to meet their needs.

(20 U.S.C. 1416(a)(3)(A) and 1442)

FFY 2015 SPP/APR Data

Number of infants and toddlers with IFSPs assessed	817.00
--	--------

Outcome A: Positive social-emotional skills (including social relationships)

	Number of Children	Percentage of Children
a. Infants and toddlers who did not improve functioning	12.00	1.47%
b. Infants and toddlers who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	350.00	42.84%
c. Infants and toddlers who improved functioning to a level nearer to same-aged peers but did not reach it	227.00	27.78%
d. Infants and toddlers who improved functioning to reach a level comparable to same-aged peers	194.00	23.75%
e. Infants and toddlers who maintained functioning at a level comparable to same-aged peers	34.00	4.16%

	Numerator	Denominator	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data	Status	Slippage
A1. Of those children who entered or exited the program below age expectations in Outcome A, the percent who substantially increased their rate of growth by the time they turned 3 years of age or exited the program $(c+d)/(a+b+c+d)$.	421.00	783.00	58.01%	40.00%	53.77%	Met Target	No Slippage
A2. The percent of infants and toddlers who were functioning within age expectations in Outcome A by the time they turned 3 years of age or exited the program $(d+e)/(a+b+c+d+e)$.	228.00	817.00	29.20%	44.50%	27.91%	Did Not Meet Target	Slippage

* FFY 2014 Data and FFY 2015 Target are editable on the Historical Data and Targets page.

Explanation of A2 Slippage

In FFY 2013, NDE was concerned with the OSEP Part C results as they were significantly different from previous Nebraska data, as well as national data. NDE partnered with the DaSY Center and TS Gold to determine strategies to address this problem. The end result was the establishment of new cut scores that formed the bases of the OSEP ratings. The original cut scores were based on a small sample. In FY2013 a larger representative sample was available from which to complete the analyses. TS GOLD decided to rerun the analyses. Data from this one year's worth of data formed the bases of the FFY 2014 Nebraska targets. Data from 2015 represents the second year of data based on the new cut scores. We would expect some fluctuation as traditionally, Nebraska has used multiple years of data to establish targets. As this year's data was reviewed, it became evident that there is still some fluctuation of data across these past two years. This may account for the slippage seen. Once Nebraska has three to four years of data (FY2016), more realistic targets can be established.

Outcome B. Acquisition and use of knowledge and skills (including early language/ communication)

	Number of Children	Percentage of Children
a. Infants and toddlers who did not improve functioning	6.00	0.73%
b. Infants and toddlers who improved functioning but not sufficient to move nearer to functioning comparable to same-aged peers	421.00	51.53%
c. Infants and toddlers who improved functioning to a level nearer to same-aged peers but did not reach it	204.00	24.97%
d. Infants and toddlers who improved functioning to reach a level comparable to same-aged peers	161.00	19.71%
e. Infants and toddlers who maintained functioning at a level comparable to same-aged peers	25.00	3.06%

	Numerator	Denominator	FFY 2014 Data*	FFY 2015 Target*	FFY 2015 Data	Status	Slippage
B1. Of those children who entered or exited the program below age expectations in Outcome B, the percent who substantially increased their rate of growth by the time they turned 3 years of age or exited the program $(c+d)/(a+b+c+d)$.	365.00	792.00	50.39%	40.50%	46.09%	Met Target	No Slippage
B2. The percent of infants and toddlers who were functioning within age expectations in Outcome B by the time they turned 3 years of age or exited the program $(d+e)/(a+b+c+d+e)$.	186.00	817.00	26.69%	34.00%	22.77%	Did Not Meet Target	Slippage

Explanation of C2 Slippage

In FFY 2013, NDE was concerned with the OSEP Part C results as they were significantly different from previous Nebraska data, as well as national data. NDE partnered with the DaSY Center and TS Gold to determine strategies to address this problem. The end result was the establishment of new cut scores that formed the bases of the OSEP ratings. The original cut scores were based on a small sample. In FY2013 a larger representative sample was available from which to complete the analyses. TS GOLD decided to rerun the analyses. Data from this one year's worth of data formed the bases of the FFY 2014 Nebraska targets. Data from 2015 represents the second year of data based on the new cut scores. We would expect some fluctuation as traditionally, Nebraska has used multiple years of data to establish targets. As this year's data was reviewed, it became evident that there is still some fluctuation of data across these past two years. This may account for the slippage seen. Once Nebraska has three to four years of data (FY2016), more realistic targets can be established.

Was sampling used? No

Did you use the Early Childhood Outcomes Center (ECO) Child Outcomes Summary Form (COSF)? No

Provide the criteria for defining "comparable to same-aged peers" and list the instruments and procedures used to gather data for this indicator.

Teaching Strategies (TS) GOLD is a scientifically-based authentic, observational assessment system designed for children from birth through kindergarten. In Nebraska, it is used for children from birth to kindergarten to evaluate their development and learning across the three functional outcomes. At a child's entry and exit, teachers/providers gather and document observations in the GOLD online system, which form the basis of their scoring across four areas of development (social/emotional, physical, language, and cognitive) and two areas of content learning (literacy and mathematics). Objectives and dimensions that comprise each of the functional outcomes are based on a crosswalk recommended by the national Early Childhood Outcomes (ECO) Center Criteria for defining "comparable to same-aged peers" was determined through Item Response Theory (IRT) analyses by Teaching Strategies, based on a national sample. The algorithms result in a 7-point rating system that parallels the ECO Child Outcome Summary (COS) ratings. These ratings by age are programmed into the GOLD online system which generates a rating based on TS GOLD scores. Research studies examining the reliability and validity of TS GOLD may be found at <http://teachingstrategies.com/assessment/research/>.

Indicator 3: Early Childhood Outcomes

Required Actions from FFY 2014

Monitoring Priority: Early Intervention Services In Natural Environments

Results indicator: Percent of infants and toddlers with IFSPs who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/ communication); and
- C. Use of appropriate behaviors to meet their needs.

(20 U.S.C. 1416(a)(3)(A) and 1442)

Actions required in FFY 2014 response

none

Responses to actions required in FFY 2014 response

Indicator 4: Family Involvement
Historical Data and Targets

Monitoring Priority: Early Intervention Services In Natural Environments

Results indicator: Percent of families participating in Part C who report that early intervention services have helped the family:

- A. Know their rights;
- B. Effectively communicate their children's needs; and
- C. Help their children develop and learn.

(20 U.S.C. 1416(a)(3)(A) and 1442)

Describe how the State has ensured that any response data are valid and reliable, including how the data represent the demographics of the State.

Describe how the State has ensured that any response data are valid and reliable, including how the data represent the demographics of the State:

The survey items were validated by the National Center for Special Education Accountability Monitoring (NCSEAM) as part of the Impact on Family Scale (IFS). Based on highly successful return rates in past years, Nebraska continued to use a personalized introductory letter to families before delivering the survey, a follow-up postcard to families, and personal contacts by local representatives to remind families to return the survey. A total of 1544 surveys were delivered to families with children in Part C in 2015-2016; 1179 surveys were completed and returned for a state return rate of 76.4% which is a 6.6% increase from the previous year. Nebraska also attempted to ensure representativeness by hand-delivering the survey to every family enrolled in Part C. Families identified as Spanish-speaking received all survey materials translated into Spanish and provided a toll-free phone number that was answered by a Spanish translator who could answer questions or read the survey to the family. A separate toll-free phone number was provided through PTI-Nebraska for families who speak other languages or those needing special assistance in reading and/or understanding the survey questions. The Nebraska survey also asks families to identify their race/ethnicity, child's age, and length of time in program.

Surveys were keyed by Westat staff and analysis of the data for the 29 Planning Region Teams was conducted by Dr. Haidee Bernstein at Westat. Rasch Analysis was conducted by Dr. Batya Elbaum that revealed a mean IFS measure at 768.17 with a scale reliability at .87. Applying the standard adopted by Nebraska Part C, corresponding measures of 538.9, 555.9 and 516.1 for sub-indicators 4a, 4b, and 4c respectively, the percent of agreement by surveyed families was calculated.

Was sampling used? No

Was a collection tool used? Yes

Is it a new or revised collection tool? No

- Yes, the data accurately represent the demographics of the State
- No, the data does not accurately represent the demographics of the State

<p>Number of documented delays attributable to exceptional family circumstances <i>This number will be added to the "Number of eligible infants and toddlers with IFSPs for whom an initial evaluation and assessment and an initial IFSP meeting was conducted within Part C's 45-day timeline" field above to calculate the numerator for this indicator.</i></p>	0
---	---

Explanation of Slippage

It appears that compliance with the 45 day timeline is at a reasonably high level. Because the requirements for this indicator has such a significant impact on the provision of services to infants and toddlers, the Co-Leads believe that it is important to continue training to ensure that all EIS programs correctly implement the specific regulatory requirements and have strategies in place to ensure compliance. The Co-Leads will continue to conduct additional professional development/technical assistance activities as outlined under the Professional Development and Technical Assistance section of the APR.

What is the source of the data provided for this indicator?

- State monitoring
- State database

Describe the method used to select EIS programs for monitoring.

The Nebraska Department of Education (NDE) and Nebraska Department of Health and Human Services (NDHHS), acting as co-lead agencies (the Co-Leads), are responsible for ensuring Part C of the Individuals with Disabilities Education Act (IDEA) is fully implemented for all infants and toddlers with disabilities and their families through the Early Development Network (EDN). The Part C Co-Leads monitor the state's 29 Planning Region Teams (PRTs) on a three year cycle. IFSP files and other records maintained by Services Coordinators are reviewed for compliance with IDEA and Medicaid.

The Individualized Family Service Plan (IFSP) checklist file review for Improving Learning for children with Disabilities (ILCD) gathers data regarding the receipt of early intervention services on IFSPs in a timely manner.

In FFY 2015, eight (8) of the Planning Regions participated in an IFSP file review for a total of 69 files. In 10 of the files the 45-day timeline was not met.

The Co-Leads notified the 3 EIS programs in writing concerning the findings of noncompliance and the requirement that the noncompliance be corrected as soon as possible but in no case more than one year from identification. The State has verified that the EIS programs are correctly implementing the specific regulatory requirements and have ensured that the children received an initial evaluation, assessment and IFSP meeting, although late, and the services listed on the IFSP within a timely manner from the IFSP meeting.

Provide additional information about this indicator (optional)

Indicator 7: 45-day timeline

Required Actions from FFY 2014

Monitoring Priority: Effective General Supervision Part C / Child Find

Compliance indicator: Percent of eligible infants and toddlers with IFSPs for whom an initial evaluation and initial assessment and an initial IFSP meeting were conducted within Part C's 45-day timeline.

(20 U.S.C. 1416(a)(3)(B) and 1442)

Actions required in FFY 2014 response

none

Responses to actions required in FFY 2014 response, **not including correction of findings**

Indicator 7: 45-day timeline
Correction of Previous Findings of Noncompliance

Monitoring Priority: Effective General Supervision Part C / Child Find

Compliance indicator: Percent of eligible infants and toddlers with IFSPs for whom an initial evaluation and initial assessment and an initial IFSP meeting were conducted within Part C’s 45-day timeline.

(20 U.S.C. 1416(a)(3)(B) and 1442)

FFY 2014 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

The Co-Leads notified each EIS program in writing concerning the finding of noncompliance and the requirement that the noncompliance be corrected as soon as possible, but in no case more than one year from identification. The State verified that each EIS program not in compliance, correctly implemented the specific regulatory requirement and ensured that all children received an evaluation, assessment, and IFSP meeting, although late, and the services listed on the IFSP in a timely manner as noted in the FFY 2014 APR. Each EIS program was required to develop and implement a Corrective Action Plan to ensure correction of noncompliance within one year. The Co-Leads monitored the implementation of the Corrective Action Plan. In addition, the Co-Leads reviewed files of newly-referred children for assurance that compliance was met and the CAP-related processes, as well as specific regulatory requirements, were implemented. Within one year of identification each EIS program was found to be in 100% compliance in meeting the 45-day timeline.

Describe how the State verified that each individual case of noncompliance was corrected

Each EIS program was required to develop and implement a Corrective Action Plan to ensure correction of noncompliance within one year. The Co-Leads monitored the implementation of the Corrective Action Plan. In addition, the Co-Leads reviewed files of newly-referred children for assurance that compliance was met and the CAP-related processes, as well as specific regulatory requirements, were implemented. Within one year of identification each EIS program was found to be in 100% compliance in meeting the 45-day timeline.

Number of documented delays attributable to exceptional family circumstances This number will be added to the "Number of children exiting Part C who have an IFSP with transition steps and services" field to calculate the numerator for this indicator.	null
--	------

Explanation of Slippage

Slippage can be attributed to 8 transition plans which were found to be out of compliance due to the lack of the individual family step or lack of a specific, individualized step/service necessary to meet the child's/family's needs contained within the transition plan. Therefore, it appears that compliance with the transition plans and timeline is at a reasonably high level. Because the requirements and appropriate documentation of transition plans and timeline for children exiting Part C has such a significant impact on the provision of services to infants and toddlers, the Co-Leads believe that it is important to continue training to ensure that all EIS programs correctly implement the specific regulatory requirements and have strategies in place to ensure compliance. The Co-Leads will continue to conduct additional professional development/technical assistance activities as outlined under the Professional Development and Technical Assistance section of the APR.

FFY 2014 Findings of Noncompliance Verified as Corrected

Describe how the State verified that the source of noncompliance is correctly implementing the regulatory requirements

In each case of noncompliance, the Co-Leads notified the EIS program in writing concerning the finding of noncompliance and the requirement that the noncompliance be corrected as soon as possible, but in no case more than one year from identification. The State verified that each EIS program not in compliance correctly implemented the specific regulatory requirement and ensured that all children exiting Part C received an IFSP with transition steps and services prior to exiting Part C. Each EIS program was required to develop and implement a Corrective Action Plan. In addition, the Co-Leads reviewed different files of children exiting Part C for assurance that compliance was met and the CAP-related processes, as well as specific regulatory requirements were implemented. Within one year of identification each EIS program was found to be in 100% compliance.

Describe how the State verified that each individual case of noncompliance was corrected

Each EIS program was required to develop and implement a Corrective Action Plan to ensure correction of noncompliance within one year. The Co-Leads monitored the implementation of the Corrective Action Plan. In addition, the Co-Leads reviewed additional files of children exiting Part C for assurance that compliance was met and the CAP-related processes, as well as specific regulatory requirements, were implemented. Within one year of identification each EIS program was found to be in 100% compliance. In the regions where transition plans did not contain appropriate documentation of transition plans for children exiting part C. The requirements and appropriate documentation of transition plans for children exiting Part C will continue to be a training topic to ensure that all EIS programs correctly implement the specific regulatory requirements and have strategies in place to ensure compliance. The state has verified that each EIS program was correctly implementing the specific regulatory requirements and ensured that all children, who had not yet exited Part C, were provided with appropriate transition plans documenting all necessary transition steps and services prior to the children exiting Part C.

Explanation of Slippage

Slippage can be attributed to only 1 IFSP/transition file which was found to be out of compliance due to the transition conference occurring late. However, the Co-Leads have verified that the toddler/family received a transition conference and transition plan, although late, prior to exiting Part C. Therefore, it appears that compliance with the transition conference timeline is at a reasonably high level. Because the requirements and appropriate documentation of transition conference timelines for children exiting Part C has such a significant impact on the provision of services to infants and toddlers, the Co-Leads believe that it is important to continue training to ensure that all EIS programs correctly implement the specific regulatory requirements and have strategies in place to ensure compliance. The Co-Leads will continue to conduct additional professional development/technical assistance activities as outlined under the Professional Development and Technical Assistance section of the APR.

What is the source of the data provided for this indicator?

State monitoring

State database

Describe the method used to select EIS programs for monitoring.

The Nebraska Department of Education (NDE) and Nebraska Department of Health and Human Services (NDHHS), acting as co-lead agencies (the Co-Leads), are responsible for ensuring Part C of the Individuals with Disabilities Education Act (IDEA) is fully implemented for all infants and toddlers with disabilities and their families through the Early Development Network (EDN). The Part C Co-Leads monitor the state's 29 Planning Region Teams (PRTs) on a three year cycle. IFSP files and other records maintained by Services Coordinators are reviewed for compliance with IDEA and Medicaid.

The Individualized Family Service Plan (IFSP) checklist file review for Improving Learning for children with Disabilities (ILCD) gathers data regarding the receipt of timely transition conference/services on IFSPs in a timely manner.

In FFY 2015, eight (8) of the Planning Regions participated in an IFSP file review for a total of 69 files, of which 33 files had children exiting Part C in which it was required to conduct a transition conference by the third birthday. The Co-Leads notified the 1 EIS programs in writing concerning the findings of noncompliance and the requirement that the noncompliance be corrected as soon as possible but in no case more than one year from identification. The State has verified that the EIS programs are correctly implementing the specific regulatory requirements and have ensured that the child/family received a transition conference and plan, although late, and the services listed on the IFSP within a timely manner from the IFSP meeting.

Provide additional information about this indicator (optional)

Indicator 8C: Early Childhood Transition

Required Actions from FFY 2014

Monitoring Priority: Effective General Supervision Part C / Effective Transition

Compliance indicator: The percentage of toddlers with disabilities exiting Part C with timely transition planning for whom the Lead Agency has:

- A. Developed an IFSP with transition steps and services at least 90 days, and at the discretion of all parties, not more than nine months, prior to the toddler's third birthday;
- B. Notified (consistent with any opt-out policy adopted by the State) the SEA and the LEA where the toddler resides at least 90 days prior to the toddler's third birthday for toddlers potentially eligible for Part B preschool services; and
- C. Conducted the transition conference held with the approval of the family at least 90 days, and at the discretion of all parties, not more than nine months, prior to the toddler's third birthday for toddlers potentially eligible for Part B preschool services.

(20 U.S.C. 1416(a)(3)(B) and 1442)

Actions required in FFY 2014 response

none

Responses to actions required in FFY 2014 response, **not including correction of findings**

Indicator 8C: Early Childhood Transition
Correction of Previous Findings of Noncompliance

Monitoring Priority: Effective General Supervision Part C / Effective Transition

Compliance indicator: The percentage of toddlers with disabilities exiting Part C with timely transition planning for whom the Lead Agency has:

- A. Developed an IFSP with transition steps and services at least 90 days, and at the discretion of all parties, not more than nine months, prior to the toddler's third birthday;
- B. Notified (consistent with any opt-out policy adopted by the State) the SEA and the LEA where the toddler resides at least 90 days prior to the toddler's third birthday for toddlers potentially eligible for Part B preschool services; and
- C. Conducted the transition conference held with the approval of the family at least 90 days, and at the discretion of all parties, not more than nine months, prior to the toddler's third birthday for toddlers potentially eligible for Part B preschool services.

(20 U.S.C. 1416(a)(3)(B) and 1442)

Correction of Findings of Noncompliance Identified in FFY 2014

Findings of Noncompliance Identified	Findings of Noncompliance Verified as Corrected Within One Year	Findings of Noncompliance Subsequently Corrected	Findings Not Yet Verified as Corrected
null	null	null	0

Correction of Findings of Noncompliance Identified Prior to FFY 2014

	Findings of Noncompliance Not Yet Verified as Corrected as of FFY 2014 APR	Findings of Noncompliance Verified as Corrected	Findings Not Yet Verified as Corrected

Overview

Indicator 11: State Systemic Improvement Plan

Data and Overview

Monitoring Priority: General Supervision

Results indicator: The State's SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

Data Analysis

A description of how the State identified and analyzed key data, including data from SPP/APR indicators, 618 data collections, and other available data as applicable, to: (1) select the State-identified Measurable Result(s) for Infants and Toddlers with Disabilities and their Families, and (2) identify root causes contributing to low performance. The description must include information about how the data were disaggregated by multiple variables (e.g., EIS program and/or EIS provider, geographic region, race/ethnicity, socioeconomic status, gender, etc.) As part of its data analysis, the State should also consider compliance data and whether those data present potential barriers to improvement. In addition, if the State identifies any concerns about the quality of the data, the description must include how the State will address these concerns. Finally, if additional data are needed, the description should include the methods and timelines to collect and analyze the additional data.

Indicator 11: State Systemic Improvement Plan

Data and Overview

Monitoring Priority: General Supervision

Results indicator: The State's SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

Analysis of State Infrastructure to Support Improvement and Build Capacity

A description of how the State analyzed the capacity of its current infrastructure to support improvement and build capacity in EIS programs and/or EIS providers to implement, scale up, and sustain the use of evidence-based practices to improve results for infants and toddlers with disabilities and their families. State systems that make up its infrastructure include, at a minimum: governance, fiscal, quality standards, professional development, data, technical assistance, and accountability/monitoring. The description must include current strengths of the systems, the extent the systems are coordinated, and areas for improvement of functioning within and across the systems. The State must also identify current State-level improvement plans and other early learning initiatives, such as Race to the Top-Early Learning Challenge and the Home Visiting program and describe the extent that these new initiatives are aligned, and how they are, or could be, integrated with, the SSIP. Finally, the State should identify representatives (e.g., offices, agencies, positions, individuals, and other stakeholders) that were involved in developing Phase I of the SSIP and that will be involved in developing and implementing Phase II of the SSIP.

Indicator 11: State Systemic Improvement

Plan

Data and Overview

Monitoring Priority: General Supervision

Results indicator: The State's SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

State-identified Measurable Result(s) for Infants and Toddlers with Disabilities and Their Families

A statement of the result(s) the State intends to achieve through the implementation of the SSIP. The State-identified Measurable Result(s) for Infants and Toddlers with Disabilities and their Families must be aligned to an SPP/APR indicator or a component of an SPP/APR indicator. The State-identified Measurable Result(s) for Infants and Toddlers with Disabilities and their Families must be clearly based on the Data and State Infrastructure Analyses and must be a child- or family-level outcome in contrast to a process outcome. The State may select a single result (e.g., increase the rate of growth in infants and toddlers demonstrating positive social-emotional skills) or a cluster of related results (e.g., increase the percentage reported under child outcome B under Indicator 3 of the SPP/APR (knowledge and skills) and increase the percentage trend reported for families under Indicator 4 (helping their child develop and learn)).

Statement

Description

Indicator 11: State Systemic Improvement Plan

Data and Overview

Monitoring Priority: General Supervision

Results indicator: The State's SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

Selection of Coherent Improvement Strategies

An explanation of how the improvement strategies were selected, and why they are sound, logical and aligned, and will lead to a measurable improvement in the State-identified Measurable Result(s) for Infants and Toddlers with Disabilities and their Families. The improvement strategies should include the strategies, identified through the Data and State Infrastructure Analyses, that are needed to improve the State infrastructure and to support EIS program and/or EIS provider implementation of evidence-based practices to improve the State-identified result(s) for infants and toddlers with disabilities and their families. The State must describe how implementation of the improvement strategies will address identified root causes for low performance and ultimately build EIS program and/or EIS provider capacity to achieve the State-identified Measurable Result(s) for Infants and Toddlers with Disabilities and their Families.

Indicator 11: State Systemic Improvement Plan

Data and Overview

Monitoring Priority: General Supervision

Results indicator: The State's SPP/APR includes a State Systemic Improvement Plan (SSIP) that meets the requirements set forth for this indicator.

Theory of Action

A graphic illustration that shows the rationale of how implementing the coherent set of improvement strategies selected will increase the State's capacity to lead meaningful change in EIS programs and/or EIS providers, and achieve improvement in the State-identified Measurable Result(s) for Infants and Toddlers with Disabilities and their Families.

Submitted Theory of Action: No Theory of Action Submitted

Provide a description of the provided graphic illustration (optional)

Certify and Submit your SPP/APR

I certify that I am the Director of the State's Lead Agency under Part C of the IDEA, or his or her designee, and that the State's submission of its IDEA Part C State Performance Plan/Annual Performance Report is accurate.
