# ILCD 3.0

- PRT Annual Performance Reports
  - These are the 8 federal performance indicators required by OSEP.
  - Includes: Child Find data, child outcome data, family outcome data, transition data, settings and services data, etc.

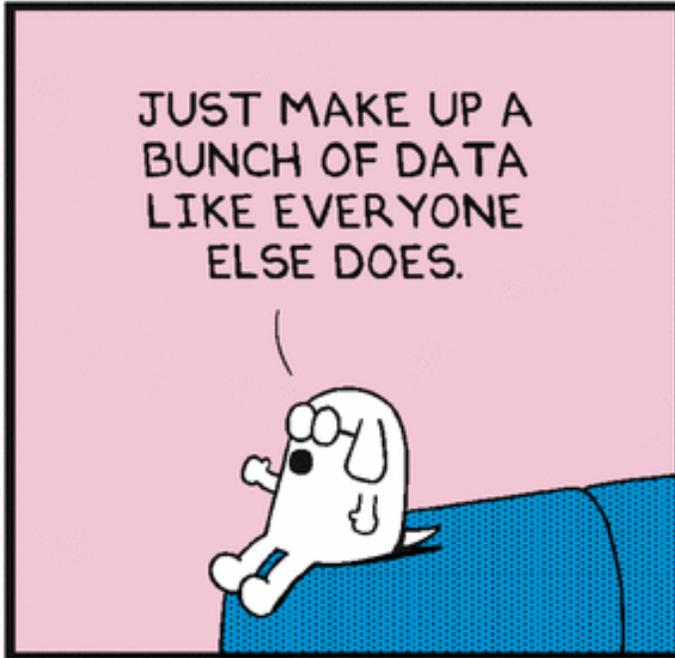

# ILCD 3.0

- Determinations
  - Provided annually and largely based upon your local performance data.
  - PRT annual meetings and minutes go into determinations

# CONNECT Reports

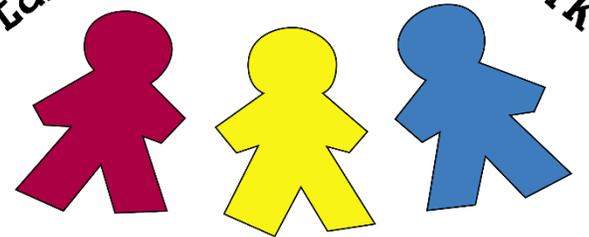

- **THE NEW CONNECT Reports Dashboard**

The screenshot shows a web browser window with the Oracle BI Interactive Dashboards interface. The browser's address bar displays the URL: [https://cio-ars-reports12c.ne.gov/analytics/saw.dll?dashboard&PortalPath=%2Fshared%2FEDN%2F\\_portal%2FEDN](https://cio-ars-reports12c.ne.gov/analytics/saw.dll?dashboard&PortalPath=%2Fshared%2FEDN%2F_portal%2FEDN). The Oracle BI logo is visible at the top left, and the user is signed in as CJohnso018. The main content area features three panels: 1) The 'Early Development Network' logo with the text 'Babies Can't Wait' and three stylized figures. 2) A box for 'The Nebraska Early Development Network' with the phone number 1-888-806-6287 and the URL <https://edn.ne.gov/cms/>. 3) A box for 'CONNECT' with a logo and a disclaimer: 'Click the CONNECT logo to go to the CONNECT application. CONNECT (Coordinating Options in Nebraska's Network Through Effective Communication and Technology) is an internet-based government computer system and contains information which is confidential and legally privileged. It is intended only for use of the individuals or entities legally authorized, and all information therein should be held in the strictest confidence. Additionally, any disclosure, copying, printing, distribution, or the taking of any action in reliance on the contents of this information, other than that which is pertinent to work assigned and authorized by the Nebraska Department of Health and Human Services (DHHS), is strictly prohibited.'

If she loves you more each and every day,  
by linear regression she hated you before you met.

Babies Can't Wait

# GOLD

- Children who receive Part C services only need entry and exit documentation and finalized checkpoints.
- Entry
  - Teachers/providers have 45-calendar days to complete documentation and finalize checkpoints within the checkpoint period in which the child's entry date is listed.
    - Note: The initial GOLD assessment begins when the child is 6 months old.
  - Tools to support entry data:
    - Information provided from evaluation and assessment materials, such as: Routine Based Interview (RBI), DAYC results, summary of visit notes, parent input, etc.
  - Include ADVISER (previously NSSRS) # in GOLD profile

# GOLD

- **Exit**

- Children receiving Part C services are to be exited from Part C on or before their third birthday.
- In order to properly exit a child they must have documentation entered and checkpoints finalized before they turn 3 years old. The child's data entered must fall in the checkpoint period in which the child's exit date is listed.

- ***How to exit a child for OSEP purposes:***

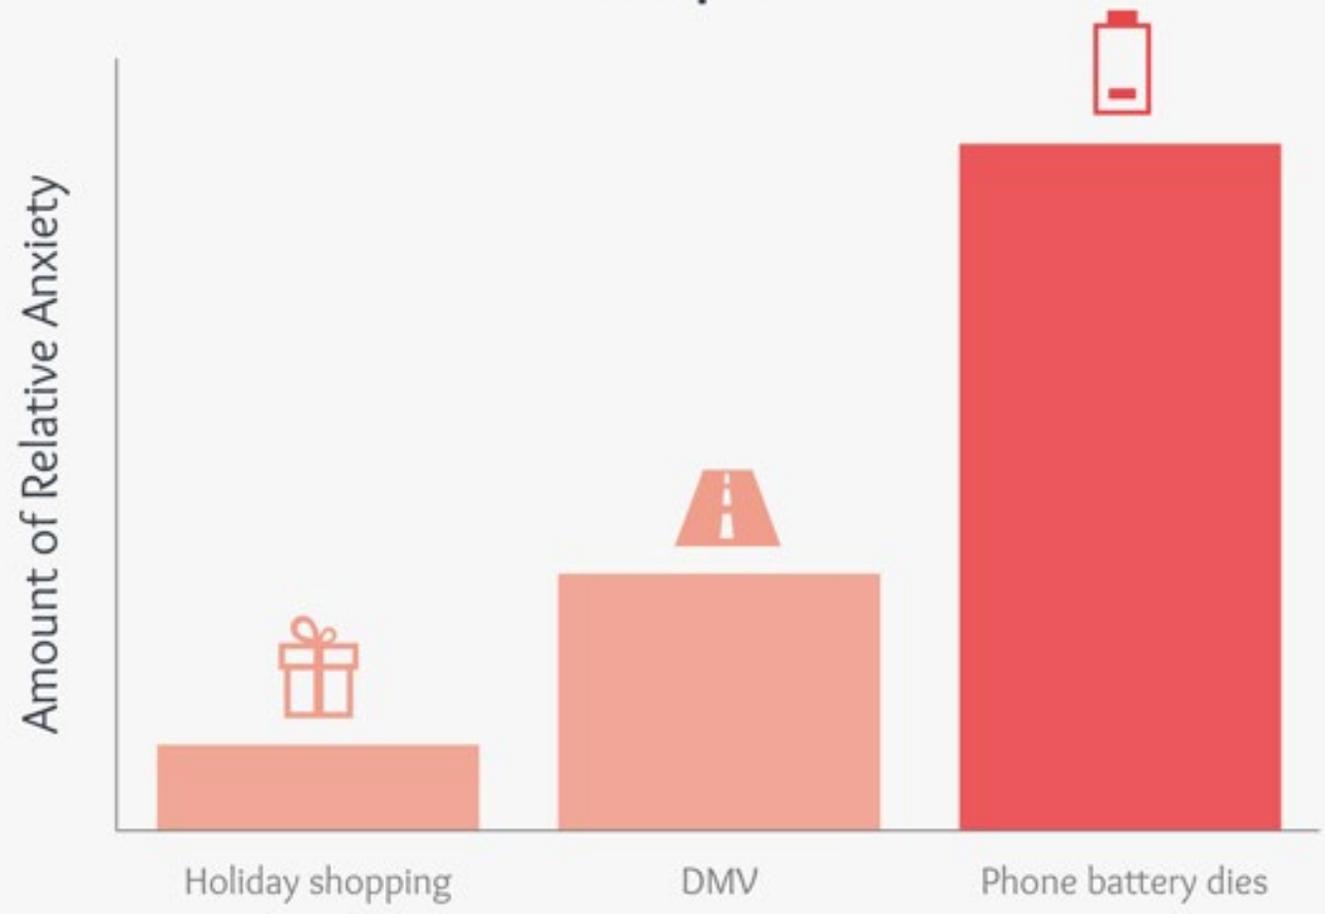

<https://teachingstrategies.force.com/portal/s/article/How-do-I-exit-child-records-from-their-IEP-IFSP>

- After a child has been exited be sure to run your OSEP Federally Mandated Year End report to see if the child is listed. If the child exited is listed on the OSEP Federally Mandated Year End report, they have been properly exited.

- ***How to generate the OSEP Federally Mandated Year End Report:***

<https://teachingstrategies.force.com/portal/s/article/How-do-I-generate-the-OSep-Federally-Mandated-Year-End-report>

# Relative Anxiety Graph

# ADVISER (formerly NSSRS)

- **WHAT:** a real time reporting system for districts to submit student level data including INFANTS and TODDLERS.
- **HOW:** Districts must enroll eligible Part C EI infants and toddlers into their student information system (SIS). This SIS will then upload that data into ADVISER
- **WHY:** This is how we gather data for our federal state child counts. Not entering Part C kids lowers PRT allocations and impacts the state's federal and PRT child count data

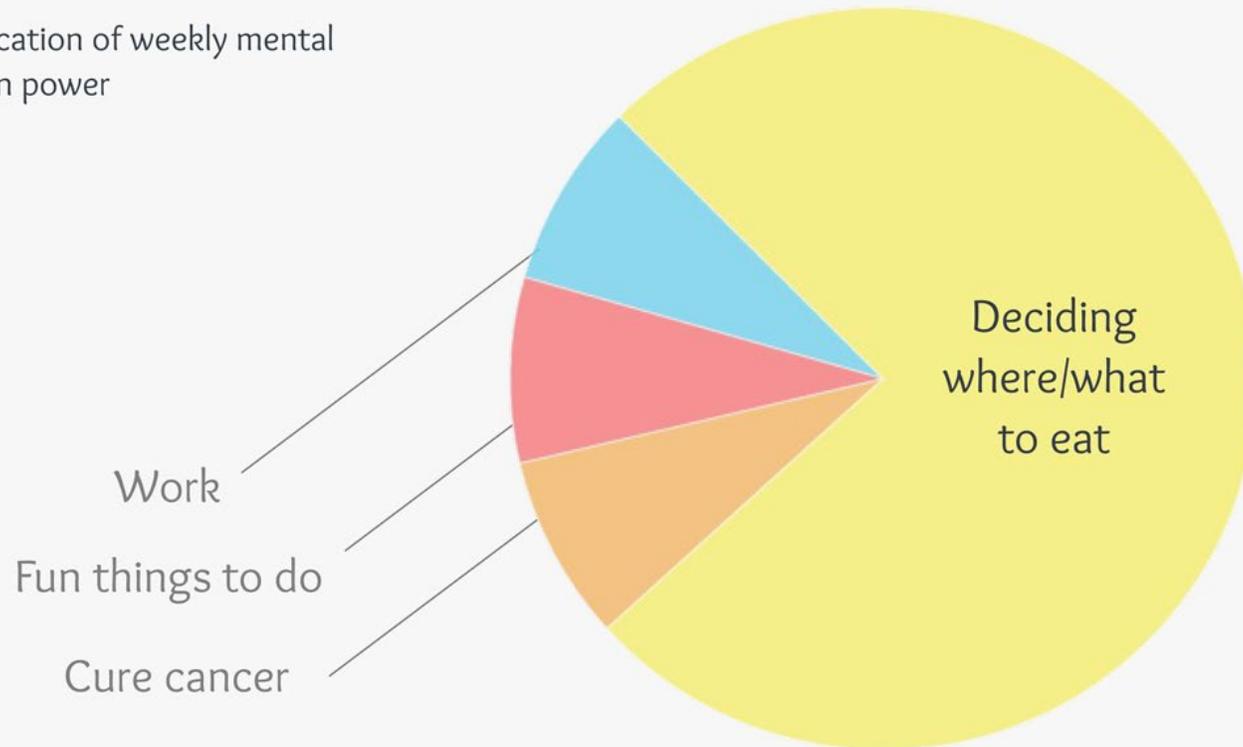

# ADVISER

- Two important child count dates:
- October 1 - This is a moment in time count where districts submit their child count--birth to 21--of kids who were enrolled and receiving services as of that date.
- June 30 - This count is important for children exiting early intervention/special education, birth-21. For Part C, this is children ending services or transitioning to Part B services and this data is captured on this moment in time count.

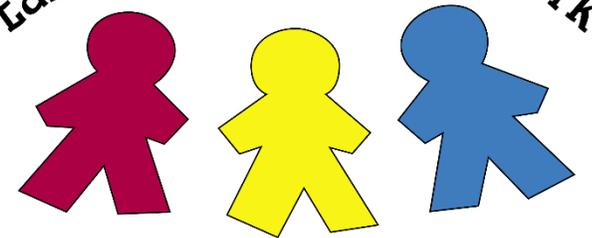

# I ASKED YOU FIRST: Where do you want to eat?

Allocation of weekly mental  
brain power

*Early Development Network*

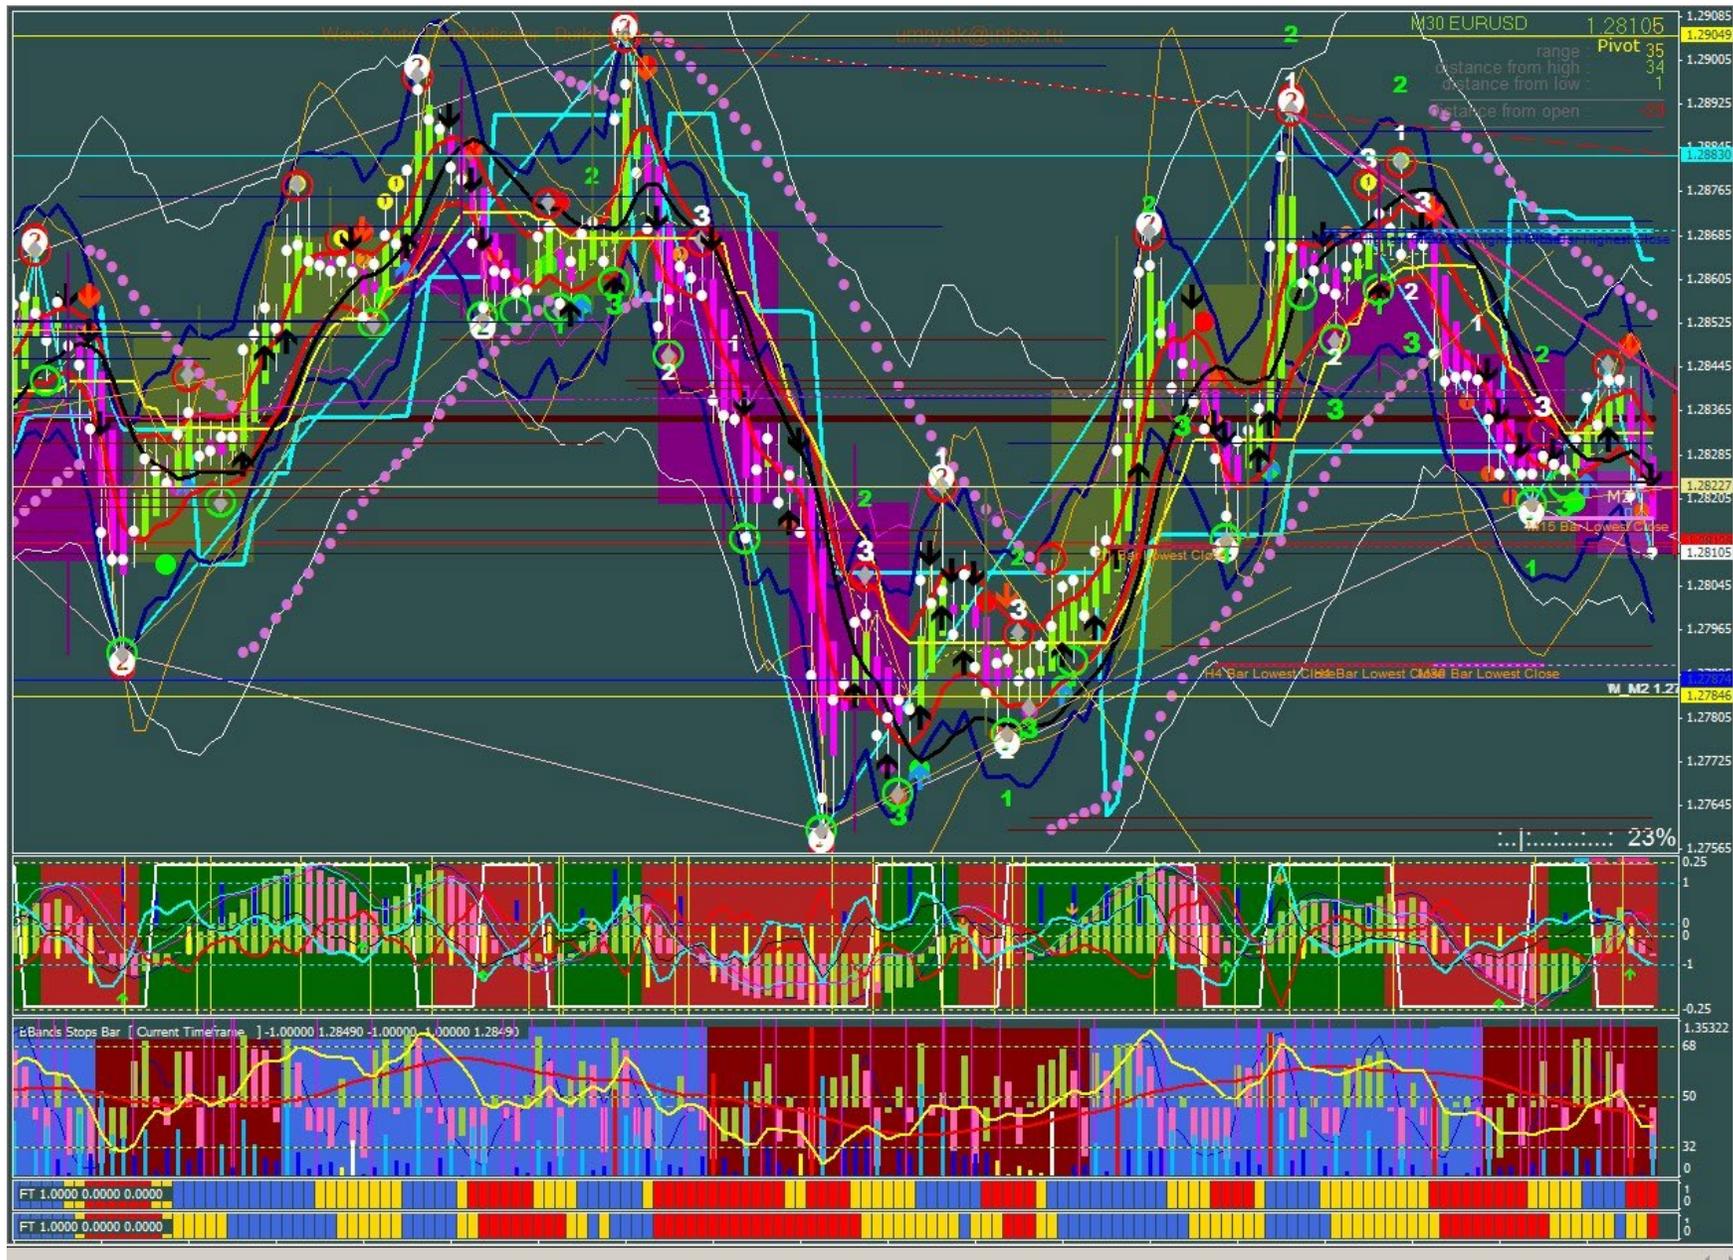

*Babies Can't Wait*

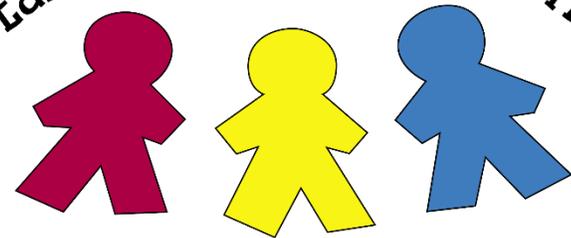

# Putting it all Together

- Data at PRT meetings
  - Moving beyond reporting just referrals and verifications. This is good for Child Find efforts but what is it doing for improved outcomes?
- Possible additions:
  - Using CONNECT data to alert districts about ADVISER and GOLD entry
  - Using ILCD performance report data
  - Discussing current monitoring data and CAP progress, if applicable
  - Tracking fidelity and professional development needs
