

This video illustrates use of the SHORE (Satisfaction with Home Routines Evaluation by McWilliam 2005, <http://edn.ne.gov/cms/sites/default/files/Satisfaction%20with%20Home%20Routines%20Evaluation.pdf>) via zoom. The IFSP team chose to do a SHORE as part of ongoing assessment for a periodic IFSP because an RBI had been done at the most recent annual meeting (see EI Ongoing Assessment Guidance, February 2017 http://edn.ne.gov/cms/sites/default/files/EI_Ongoing_Assessment_Guidance_FIN_AL1.pdf). The provider (PSP) and the services coordinator were both part of this assessment along with the parent. The SHORE was followed by the IFSP during which routines were added to the family priorities from information gathered, and measurement determined by the team.
